THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME 46.

(January–June, 1933.)

INDEX.

A.

Abscesses in pigs, 77.
Acidity in cheese manufacture, slow development of, 225.
Ahuriri lagoon lands, 69, 260.
Allan, H. H.—
  Notes on recently observed exotic weeds, 162, 233.
  Apple root-stock investigations, 256.
  Fleabane and sea aster, 341.
Animal and human nutrition, 326.
Answers to inquiries, 62, 124, 186, 250, 313, 375.
Aphides on vegetables, &c., control of, 153.
Apiary, the (monthly notes), 54, 116, 178, 242, 305, 359.
Apple root-stock investigations, 256.
Apples, russeting of, 59.
Areas of grassland top-dressed, 1930–32, 124.
Arsenate sprays, 211.
Arsenic pentoxide, use of, in hard-fern control, 375.
Aston, B. C.—
  A potential danger to cows in dairy washings, 46.
  Supply of phosphates to stock through the drinking-water, 345.
  The Napier-Ahuriri lagoon lands, 69, 260.
  The Lake Ellesmere submerged lands, 315.
Aston, B. C., and Bruce, J. A.—
  The chemistry of weed-killers, 108, 230.

B.

Barley grain as sheep feed, 313.
Barry, W. C.—Swine fever, 321
Blossom-end rot of tomatoes, 293.
Bluestone drench, vessels for, 313.
Brogan, F. J. A.—See Grimmett and Brogan.
Brown, F. C.—Poultry-keeping, 52, 114, 176, 240, 302, 357.
Bruce, J. A.—
  Commercial fertilizers and their basis of sale, 195.
  See also Aston and Bruce.
Bruising of sheep and lamb carcasses: Some contributing factors and preventive measures, 221.
Butter, potato flavour in, 292.
Butter, salted, mottled colour in, 288.
Buttercups in pasture, 62.

C.

Caps and cap cloths, cheese, 296.
Carcasses, sheep and lamb, bruising of, 221.
Celery-spot and its control, 289.
Certificate-of-record system, review of, in year 1932, 125.
Certification of seed: A review of the New Zealand system, 187.
Certification of seed potatoes: Provisional certificates issued for season 1932–33, 368.
Certification of seed potatoes: Some observations made during five years' operations, 165.

Chamberlain, E. E.—
Wilt diseases of tomatoes due to *Fusarium lycopersici* and *Verticillium albo-atrum*, 38.
Blossom-end rot of tomatoes, 293.
Chapman's Seedling strawberry, 320.
Chemistry of weed-killers, the, 108, 230.
Chemistry Section—
Fertilizer importations (quarterly), 186, 310.
Importation of fertilizers in 1932–33, 347.
Check-testing of suppliers' milk and cream samples at dairy factories, 22.
Cheese caps and cap cloths, 296.
Cheese manufacture, slow development of acidity in, 225.
Chicks, brooder, cod-liver oil for, 350.
Crested wheat-grass, 62.
Cidermaking and cider apples, 107.
Cidermaking, improved methods of, 250.
Circling disease of sheep, 251.
Citrus culture (monthly notes), 51, 114, 176, 240, 302, 357.
Citrus-fruit species and varieties in New Zealand, 98.
Claridge, J. H.—Seed-potato certification, 165.
Clover, white, strain investigation of 78.
Cod-liver oil for brooder chicks: A further experiment at Wallaceville, 350.
Commercial fertilizers and their basis of sale: VII. The choice and purchase of fertilizers, 195.
Connell, R. P.—
The farm, 47, 110, 171, 235, 297, 352.
The grass grub and its control, 332.
Cottier, W.—See Cunningham and Cottier.
Cows, a potential danger to, in dairy washings, 46.
Cows, purebred dairy, testing of, 125.
Cunningham, G. H., and Cottier, W.—
Orchard sprays in New Zealand, 211.
Curd-testing machine, electrically driven, 312.
Curly-tip fibres of the Romney sheep, 279.

D.

Dairy Division—Dairy factories in New Zealand, 1932–33, 351.
Dairy factories in New Zealand, 1932–33, 351.
Dairies, licensing of new manufacturing, 59.
Dairy washings, a potential danger to cows in, 46.
Dayus, C. V.—Bruising of sheep and lamb carcasses, 221.
Dempster, W.—A new electric steam-sterilizer for dairy plant and utensils, 46.
Denz, F. A.—See Grimmett and Denz.
Doak, B. W.—See Hudson and Doak.
Dominion Meteorological Office.—Weather records, 60, 122, 184, 248, 311, 366.
Drinking-troughs and mammitis, 314.
Drinking-water, supply of phosphates to stock through the, 345.
Dry, F. W.—Hairy fibres of the Romney sheep, 10, 141, 279.

E.

Earp, E. A.—The Apiary, 54, 116, 178, 242, 305, 359.
Earwig pest, the, 62.
Earwigs and woodlice, protective device against, 310.
Electrically driven curd-testing machine, 312.
Electric steam-sterilizer for dairy plant and utensils, a new, 46.
Ellesmere, Lake, submerged lands, 315.
Ensilage, forage crop for, 314.
Everett, P.—Citrus-fruit species and varieties in New Zealand, 98.

F.

Farm, the (monthly notes), 47, 110, 171, 235, 297, 352.
Feeding potato shaws and tubers to dairy stock, 124.
Fertilizer importations (quarterly returns), 186, 310.
Fertilizers, commercial, and their basis of sale, 195.
Fertilizers, importation of, in 1932–33, 347.
Fibres, hairy, of the Romney sheep, 10, 141, 279.
Fields Division—
Potato manuring experiments in the South Island, season 1931–32, 90.
Certification of seed potatoes: Provisional certificates issued for season 1932–33, 368.
Fireblight and pear varieties, 250.
Fireblight, effective control of, on pear-trees, 194.
Fleabane and sea aster: Their identification and incidence in tidal-land reclamation, 341.
Forage crop for ensilage, 314.
Fowl manure for orchard, 376.
Frost, H. F.—The Orchard, 50, 113.
Frost injury to lemon-trees, 59.
Fusarium lycopersici, 38.

G.

Gill, D. A.—Circling disease of sheep, 251.
Grass grub and its control, the, 332.
Grassland, areas of, top-dressed, 124.
Grassland research at Welsh Plant Breeding Station, 97.
Grimmett, R. E. R., and Denz, F. A.—Some factors in the availability of ground limestone as plant food, 23.
Grimmett, R. E. R., and Brogan, F. J. A.—Some soils of the Taranaki district, 154.
Ground limestone as plant food, some factors in the availability of, 23.

H.

Hadfield, J. W.—
Turnip and rape seed production in New Zealand, 1, 63.
Seed certification, 187.
Hairy fibres of the Romney sheep, 10, 141, 279.
Halo-hairs of the Romney sheep and their inheritance, 10.
Hard-fern control, use of arsenic pentoxide in, 375.
Heifer with wart-like growths, 314.
Horticulture (monthly notes), 56, 118, 180, 244, 306, 361.
Hudson, A. W., and Doak, B. W.—Investigations in pasture production: IV, 338.
Hudson, A. W., and Woodcock, J. W.—Potato manuring experiments in the South Island, season 1931–32, 90.
Hyde, W. C.—Horticulture, 56, 118, 180, 244, 306, 361.

I.

Imperial Agricultural Bureaux, periodicals of the, 376.
Importation of fertilizers in 1932–33, 347.
Inventions of agricultural interest, 59, 186, 314.
Inquiries, answers to, 62, 124, 186, 250, 313, 375.
Investigations in pasture production: IV. The effect of using nitrogen and potash as adjuncts to superphosphate and a comparison of two "concentrated" fertilizers with simple mixtures, 338.

L.

Lagoon lands, Napier-Ahuriri, 69, 260.
Lake Ellesmere submerged lands, 315.
Lemon-trees, frost injury to, 59.
Levy, E. Bruce.—Strain investigation of white clover, 78.
Levy, E. Bruce, and Madden, E. A.—The point method of pasture analysis, 267.
Licensing of new manufacturing dairies, 59.
Lick for sheep, 375.
Lime and nitrogenous manures, 313.
Lime, use of, with nitrogenous fertilizers, 376.
Limestone, ground, some factors in the availability of, as plant food, 23.

M.

Madden, E. A.—See Levy and Madden.
Mammitis and drinking-troughs, 314.
Marshall, P.—Report on the basin of Lake Ellesmere, with special reference to source of the water and bottom deposits, 317.
McCulloch, W. J.—Pasture top-dressing trials in Wellington and Southern Hawke's Bay districts, 103.
Milk and cream samples, check-testing of, at dairy factories, 122.
Mottled colour in salted butter, 288.
Munro, D., and Wright, R.—The rabbit pest and its control, 26.

N.

Napier-Ahuriri lagoon lands: A survey of soils and their plant associations, 69, 260.
Neill, J. C.—
Wheat diseases in New Zealand, 137.
Production of disease-free swede seed, 207.
Celery-spot and its control, 289.
New electric steam-sterilizer for dairy plant and utensils, 46.
Nitrogenous fertilizers, use of lime with, 376.
Nitrogenous manures and lime, 313.
North Taranaki pasture competition: Review for season 1932–33, 327.
Notes on recently observed exotic weeds, 162, 233.
Noxious weed order, 170.
Nutrition, animal and human, 326.

O.

Orchard sprays in New Zealand: IV. The arsenate series, 211.
Orchard, the (monthly notes), 50, 113, 175, 238, 300, 355.

P.

Paspalum in lawn, controlling, 313.
Pasture analysis, the point method of, 267.
Pasture competition, North Taranaki, 327.
Pasture production, investigations in, 338.
Pasture top-dressing trials in Wellington and Southern Hawke's Bay districts, 1926 to 1932, 103.
Paynter, L.—Citrus culture, 51, 114, 176, 240, 302, 357.
Pear varieties and fireblight, 250.
Periodicals of the Imperial Agricultural Bureaux, 376.
Phormium tenax, research work on, 121.
Phosphates, supply of, to stock through the drinking-water, 345.
Pigs, abscesses in, 77.
Point method of pasture analysis, the, 267.
Potatoes, seed, certification of, 368.
Poultry-keeping (monthly notes), 52, 114, 176, 240, 302, 357.
Potato flavour in butter, 292.
Potato manuring experiments in the South Island, seasons, 1931–32, 90.
Potato shaws and tubers, feeding to dairy stock, 124.
Potential danger to cows in dairy washings, a, 46.
Prairie-grass, 124.
Production of disease-free swede-seed: Preliminary trials under the small-farm plan, 207.
Protective device against earwigs and woodlice (slaters), 310.
Purebred dairy cows, testing of, in 1932, 125.

R.

Rabbit pest and its control, the, 26.
Ragwort poisoning in cows, 250.
Rainfall at representative stations, 61, 122, 184, 248, 311, 366.
Rape and turnip seed production in New Zealand, 1, 63.
Research work on *Phormium tenax*, 121.
Riddet, W.—See Whitehead and Riddet.
Root-stock, apple, investigations, 256.
Rushes, ridding a paddock of, 375.
Romney sheep, hairy fibres of the, 10, 141, 279.
Russeting of apples, 59.

S.

Sawers, J. B.—Cheese caps and cap cloths, 296.
Sea aster and fleabane, 341.
Seasonal notes, 47, 110, 171, 235, 297, 352.
Seed certification: A review of benefits and cost under the New Zealand system, 187.
Seed-potato certification: Some observations made during five years' operations, 165.
Seed potatoes, certification of, 368.
Seed production, turnip and rape, in New Zealand, 1, 63.
Sheep and lamb carcasses, bruising of, 221.
Sheep, circling disease of, 251.
Sickle-fibres of the Romney sheep, 141.
Silver-leaf in apricot-trees, 46.
Singleton, W. M.—Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in year 1932, 125.
Slow development of acidity in cheese manufacture: Investigation of a typical case of " non-acid " milk, 225.
Smith, J. M. — The North Taranaki pasture competition: Review for 1932–33, 327.
Sodium chlorate and lime for blackberry and gorse destruction, 186.
Sodium chlorate, dangers of, 230.
Sodium chlorate spray, colouring, 161,
Soils, some, of the Taranaki district, 154.
Some factors in the availability of ground limestone as plant food, 23.
Some soils of the Taranaki district, 154.
Sprays, orchard, in New Zealand, 211.
Steam-sterilizer, a new electric, for dairy plant and utensils, 46.
Strain investigation of white clover: Finalized results of trials at Plant Research Station, 78.
Strawberry, Chapman's Seedling, 320.
Swede seed, production of disease-free, 207.
Sweeps, light tumbler, 25.
Swine fever, 321.
Supply of phosphates to stock through the drinking-water, 345.

T.

Taranaki district, some soils of the, 155.
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in year 1932, 125.
Tomatoes, blossom-end rot of, 293.
Tomatoes, wilt diseases of, due to *Fusarium lycopersici* and *Verticillium albo-atrum*, 38.
Top-dressed areas, 1930–32, 124.
Top-dressing, pasture, trials in Wellington and Southern Hawke's Bay districts, 103.
Tumbler sweeps, light, 25.
Tung-oil trees in Nelson District, 224.
Turnip and rape seed production in New Zealand, 1, 63.

V.

Verticillium albo-atrum, 38.

W.

Wart-like growths, heifer with, 314.
Weather records, 60, 122, 184, 248, 311, 366.
Weed-killers, chemistry of, 108, 230.
Weeds, exotic, notes on recently observed, 162, 233.
Wheat-grass, crested, 62.
Whelan, J. W.—The orchard, 175, 240, 300, 355.
Wheat crop, quality of the new season's, 136.
Wheat diseases in New Zealand: Notes on their incidence and control, 137.
White clover, strain investigation of, 78.
Whitehead, H. R., and Riddet, W.—Slow development of acidity in cheese manufacture, 225.
Wilt diseases of tomatoes due to *Fusarium lycopersici* and *Verticillium albo-atrum*, 38.
Woodcock, J. W.—See Hudson and Woodcock.
Wright, R., and Munro, D.—The rabbit pest and its control, 26.
